## Better Efficiency and Productivity

- **Reduce or Eliminate Tap Breakage:** Using quick change torque control tap adapters, the clutch in the adapter ratchets when the tap hits the bottom of the hole, encounters an interference in the hole or when the tap dulls. This prevents tap breakage and allows for the tap to be quickly replaced if needed.
- **Maximize Manpower:** By placing a Roscamat®USA tapping arm next to your machining center, a significant improvement in productivity can be achieved. While the machining center is drilling holes in the next part the...
Quality & Dependability
• Heavy duty cast aluminum construction
• More than 32 years experience designing, manufacturing and servicing tapping arms
• Adjustable balance for easy maneuverability
• Premium fit and finish

Light & Versatile
• Light weight and compact size allow for easy set up and relocation
• Reaming, countersinking, fastening, inserts & small diameter drilling

Practical & Simple
• Uses standard quick change tap adapters
• Utilize interchangeable speed modules to get the right torque and RPM for the job
• Wide range of models and options allow you to precisely choose the perfect arm for your application

Reliable & Safe
• One year warranty against defects in materials and workmanship
• Robust materials & construction exceed design standards providing a lifetime of use
• Precisely Engineered Motors
• Roscamat® motors are designed, engineered, and built for tapping
• High frequency, low noise electric motor uses 8.5x less energy than pneumatic

Why Roscamat® USA tapping arms:
• Operator can be tapping the holes in the previous part. Typically, tapping is the slowest and last operation on a machining center.
• Take the Guess Work Out of the Process: With Roscamat® USA tapping arms the operator can bring the tap to the work which is 3-4 times more efficient than bringing the work piece to a fixed spindle.
• More Efficient Tapping: By utilizing quick change modules and tap adapters the proper speed and torque can be achieved for different tap sizes to improve efficiency and productivity.
Electric Machines

MOSQUITO

(90 kg./mm²)
M16 (aluminium)

TAP UP TO M14 9/16”

Orientable
Head V-H, 4x90°

GREEN POWER

Model
R·MOSQUITO

Reach 765 mm. - 30”
Height 515 mm. - 20”

- Single Phase 220/230 V. – Available at 110 V.
- Heavy duty cast aluminium construction
- Base elevator
- High frequency Electric Motor
- Speed control forward & reverse
- Tap adaptors of size 19/1 for quick change

OPTIONS AVAILABLE

- Vertical tapping
- Vertical & Horizontal tapping –VH- (4x90º)
- Tool lubrication with timer

Description | Head orientation | Speed RPM | Capacity (Steel 90 kg./mm²) | Max Torque Nm

Single Phase 220 VOLT Available in 110 V

Modules for Model R-SHARK
**Model**

**R·Dragon V / RHM / RHC**

Radius 2.255 mm  
Height 1.139 mm  
- Tap up to M27  
- Multiposition tapping headmember  
- High frequency electric motor  
- 220V or 110V single phase  
- Forward&Reverse Speed control variator  
- Size ø31&ø19 tap adapters for quick change  
- 7 interchangeable speed modules  
- Heavy duty cast aluminium construction

**OPTIONS AVAILABLE**

- Vertical tapping  
- RHM Multiposition, tap in any angle normally  
- RHC, Multiposition tap in any angle keeping perpendicularity  
- Tool lubrication system -E-

**Model**

- **R·Dragon V**

Sold in 5 continents and 85 countries
is a division of the Tecnospiro Machine Tool Company located in Sant Joan de Vilatorrada a small village about 40 miles west of Barcelona. The company is family owned and has been in business since 1947. Utilizing a state of the art manufacturing facility and a dynamic engineering staff that has been very innovative in design and inventing new products.

After 32 years in the market and covering the five continents and more than 85 countries, we are proud to be the reference in the market having more than 25,000 pieces of equipment working successfully.
